Summary

Junior frontend developer who builds responsive, accessible web interfaces with React and Next.js. Comfortable turning designs into clean, reusable components styled with Tailwind CSS and shadcn/ui, and currently growing in TypeScript. Looking for a role on a product team where I can ship features, learn from code review and keep improving performance and code quality.

Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3, TypeScript (working knowledge)
- **Frameworks and libraries:** React, Next.js (App Router, server and client components, routing, data fetching)
- **Styling and UI:** Tailwind CSS, shadcn/ui, Flexbox, CSS Grid, responsive and mobile-first design
- **Tools:** Git, GitHub, npm, VS Code, Chrome DevTools, Vercel
- **Practices:** component-based architecture, REST API integration, form handling and validation, semantic HTML, basic accessibility (ARIA, keyboard navigation), Core Web Vitals awareness

Projects

[Project Name] | E-commerce Storefront
Next.js, React, Tailwind CSS, shadcn/ui | Live demo | Code

- Built a product catalog with category filters, search and a persistent shopping cart using React state and local storage.
- Used Next.js routing and image optimization to keep pages fast, reaching a Lighthouse performance score of [90+].
- Built accessible dialogs, dropdowns and toasts with shadcn/ui and adapted them to a custom Tailwind theme with dark mode.

[Project Name] | Task Management Dashboard
React, TypeScript, Tailwind CSS | Live demo | Code

- Created a dashboard for adding, editing, filtering and sorting tasks, with drag-and-drop status columns.
- Wrote typed props and data models in TypeScript to catch errors before runtime.
- Designed a fully responsive layout that works from 320px mobile screens up to wide desktops.

[Project Name] | Personal Portfolio Website
Next.js, Tailwind CSS | Live site

- Designed and deployed a portfolio on Vercel with project case studies, a working contact form and SEO metadata.
- Added smooth section navigation, dark mode and lazy-loaded images for quick load times.

Experience

[Job Title, e.g. Frontend Developer Intern / Freelance Web Developer] | [Company or Self-employed], [City]
[Month Year] to [Month Year or Present]

- Converted Figma designs into pixel-accurate, responsive React components for [number] client pages.
- Integrated REST APIs to display live data, with loading and error states.
- Fixed layout and cross-browser bugs and improved page load time by [X%].
